

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

Message from the Editor

Dear Readers,

On behalf of the SAEBS Research and Publication Unit, I would like to share with you our first issue of SAEBS Outlook for 2017.

We encourage all of you to contribute feature articles and other stories for the coming issue.

We will be delighted to receive your contributions in this regard. Email your submission to nandonde@suanet.ac.tz

Felix Adamu Nandonde

News Editor

Mr Sewando (on the right) shaking hands with his principal supervisor Dr Khamaldin Mutabazi in the day of his PhD oral defense.

SAEBS Members Presented Papers at International Conference

1. Hella, J.P.; Z.C. Mkwangwa and S. Kazyoba (2017). The Law of Minimum: Linking Potash fertilizer utilization, farm level productivity and economic losses in Tanzania. In the proceeding of the 1st Potash fertilizer workshop in Tanzania held in March 2017, ARI Mlingano Tanga.

Workshop participation

Prof Joseph Hella participated in the Inter-Drought –V which was held in Hyderabad (India) International Conference Centre between 21st and 25th February 2017. Inter-Drought V conference brought together researchers from disciplines such as plant and crop physiology, genomics, genetics and breeding who presented recent advances in these and allied fields related to plant response to water deficit, climate change and phenotypic and genetic variability. Sokoine University of Agriculture, and specifically the School of Agricultural Economics and Business Studies (SAEBS) was represented by Prof Joseph Hella, Mr Romanus Mwakimata (MSc student), and Flora Nyanana (research collaborator representing the Local Government Authority from Shinyanga region) (Pictured). The team was sponsored by Groundnuts – Tropical Legume III (TL III) project. During the conference, two poster papers were presented.

Flora Nyanana on the left and Romanus Mwakimata on the right presented papers in the Inter-Drought-V conference in Hyderabad, India.

Prof Joseph Hella poses for the photo next to the welcome notes in India.

Technology at LAPF International Conference Centre, Dar es Salaam on 30th March 2017.

Dr Fasha presenting a paper in that workshop.

Continuing Research Activities at SAEBS

BSU II has awarded six young researchers at SAEBS to do research in different value chain for eight months from November 2016 to June 2017. The project at the School level is coordinated by Dr Zena Mpenda and Dr Adam Akyoo. Some of the projects which are sponsored by BSU II and are carried by SAEBS staff are as follows:

1. Dr Felix Adamu Nandonde is researching on *'the role of intermediaries on 'The role of intermediaries in food distribution in the era of emergence of supermarkets in Tanzania'*. Dr. Nandonde is working with Dr Daniel Ndyetabula and Prof John Kuada from Sokoine University of Agriculture and Aalborg University respectively. Dr. Nandonde will visit Aalborg University for one month from April to May for research dissemination activities with a partner from Denmark.

2. Dr. Roselyne Alphonse is researching on *'Consumer buying behaviour of agro-processed foods: how the dynamics in food systems influence their eating habits'*. Dr. Alphonse is working with Dr. Betty Waized and Prof Marriane Nylandsted Larsen from Sokoine University and Copenhagen University. Dr. Roselyne will visit

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

Copenhagen University from 17-28 May for research dissemination activities with partner from Denmark.

SAT supports research in organic farming

Thobias John Komba has won a research award from Sustainable Agriculture Tanzania (SAT) to support his special project. Mr. Komba will be working on '*organic vegetables production: is it viable given the market situation in Tanzania?*'. Mr. Komba will be supervised by Dr. Goddy Sanga. The project was selected after a competition which involved more than 50 students from different degree programmes offered at SUA.

'SAEBS PhD fellow visited University of Copenhagen'

Lekumok Kironyi a PhD candidate at SAEBS returned to Tanzania on 28th February 2017 after completing a six-month (September 2016 to February 2017) study stay at the University of Copenhagen, Institute of Geosciences and Natural Resources (IGN), in Denmark.

While in Denmark, Lekumok attended postgraduate courses, including PhD Course on academic writing, responsibly conduct of research, and GPS use. As a member of a research group at IGN (Environment and Society in Developing Countries) Lekumok attended professional research group meetings and presented his research project activities in Tanzania.

The focus of his PhD research in Tanzania is on how governance practices (public and private) in relation to land, water and waste management have developed in support of rural-urban transformation. The PhD research is conducted in Ilula, Kilolo District and Madizini Mvomero District. The PhD research is supervised by Dr Jeremiah Makindara and Dr Evelyne Lazaro.

The PhD study is part of capacity building objective of the research project Rural-Urban Transformation (RUT): Economic Dynamics, Mobility and Governance of Emerging Urban Centres for poverty reduction. RUT is a DANIDA funded collaborative research project between Sokoine University of Agriculture, School of Agricultural Economics and Business Studies and University of Copenhagen, Institute of Geosciences and Natural Resources (IGN), section of Geography. Three PhD candidates: one Danish and two Tanzanians will be trained through this research.

Outstanding performance of SUA students at the shared facility in South Africa

On January 25th, 2017 the Academic Advisory Board of the Collaborative Masters in Agricultural and Applied Economics (CMAAE) approved the Shared Facility for Specialization and Electives (SFSE) 2016 Examination Results. Students from Sokoine University of Agriculture (SUA), who attended the specialization and elective courses at the University of Pretoria, emerged as the second best performers with an overall score of 74.8%. Msangi Haji Athuman—a young brilliant young male student from SUA was among the top three with an average of 84.1% and was very close to top best whose score was 84.7%. The Department of Agricultural Economics and Agribusiness and the School of Agricultural Economics and Agribusiness Studies is very delighted with this outstanding performance, which indeed, reflect the quality of postgraduate training within the department and SUA at Large. The Department is dedicated to improve further the quality of all training programmes and remain competitive locally and internationally.

Training

Zanzibar Malaki,C.O,Nguma,F. and Watuta,Y.M in February 2017 organised training in Zanzibar on Dairy sector Development and Business Coach – The training was focused on milk hygiene and

SAEBS Outlook

First Quarter 2017

entrepreneurship. Agriculture Service Support Programme (ASSP) and Agriculture Sector Development Programme – Livestock (ASDP-L) are jointly programme funded by IFAD and implemented in Unguja and Pemba. The programme main objective is to improve economic returns to smallholder farmers, fisher-folk and rural economically active poor households and thus increase their income and reduce poverty.

Mr Malaki in second position from right, with other facilitators and participants of the training organised in Zanzibar.

SAEBS Members at International/National Assignments

Prof Damian Gagambi and Dr Adam Akyoo were invited for a two workshop to discuss issues related to agri-food system in Eastern and Southern African region in Lusaka, Zambia. The event was organised by VUNA, IAPRI and DST-NFR took place in Lusaka, Zambia, from 16th to 17th March at Hotel Continental.

Prof Gabagambi (with blue navy coat) and Dr Akyoo (with gray patched coat) following very closely presentation in IAPRI workshop in Lusaka, Zambia.

'Agribusiness' Road handled over

The new road that connect SAEBS and the University road has been handled over to the University. The 0.9km tarmac road was constructed under the support of World Bank will be known as '*Agribusiness Road*'. The road was constructed by Deep Construction Company and during the handover ceremony SAEBS was presented by Acting Dean Prof Damian Gabagambi. The World Bank coordinator, Prof Bernard Chove and estate directory acting head, Prof Fred Kahimba was also present. It was also established that the plans are in the pipeline to upgrade the remaining gravel part of the road to bitumen level and make it the main University road.

PhD Presentations at SAEBS

From January to March 2017, seven PhD presentations were conducted at SAEBS. These works range from those who are at early stages to those who are finalizing it.

On 23rd March 2017 two PhD presentations were conducted by PhD fellows

1. Mr. Tiri Gyang Dakyong presented his proposal on 'Growth enhancement support scheme and its impact on productivity and household welfare of smallholder maize farmers in Kano State, Nigeria'. Mr. Dakyong is supervised by Prof Gilead Mlay and Dr Roselyne Alphonse. Discussants were Prof Ntengua Mdoe and Dr Gody Sanga.

2. Mr. Nicholaus Musimu Kuboja presented research findings from his PhD project which is titled 'Adoption and impacts of improved beekeeping technologies in the Miombo woodland of Tanzania'. Mr. Kuboja is supervised by Prof Aida Isinika and Prof Kilima and discussants for his work were Dr Fulgence Mishili and Dr Zena Mpenda.

On 9th March 2017, three PhD presentations were conducted.

1. Ms. Martha Swamila presented her PhD concept note which is titled 'Economic viability of sustainable intensification technologies for maize based production systems in dryland areas of Dodoma and Manyara regions, Tanzania'. She is supervised by Dr Damas Philip and Dr Adam Akyoo. Dr Khamaldin Mutabazi and Dr Felix Adamu Nandonde were discussants.

2. Ms. Bwakweza Beatrice presented her paper from her PhD thesis which is titled 'Examination of the processing technologies used by cassava processors in Tanzania'. She is supervised by Prof Damian Gabagambi and Prof Ephreim Senkondo. Prof Joseph Hella and Dr Damas Philip were discussants.

3. Mr. Lutengano Mwinuka presented a paper based on his PhD project which is titled 'An economic risk analysis of fertiliser microdosing and rainwater harvesting in a semi-arid farming system in Tanzania'. Mr. Lutengano authored the paper with Dr Khamaldin Mutabazi, Dr Jeremiah Makindara, and Prof Stefan Stieber. The discussant was

On 9th February 2017 four presentations were conducted by PhD fellows

1. Mr. Andrew Rogers presented a research proposal titled 'Economic of newly introduced tropical adapted and improved chicken ecotypes at village level in Tanzania'. Mr. Rogers is supervised by Dr Jeremiah Makindara and Dr Roselyne Alphonse. Prof Joseph Hella and Dr Elibariki Msuya were discussants.

2. Mary Kurwijila presented two papers which are based on her PhD Project. The first paper is titled 'Post-harvest losses and their effects on grape profitability among smallholder farmers and marketers in Dodoma Region of Tanzania'. The discussants were Dr Adam Akyoo and Prof Gilead Mlay. The second paper is titled 'Determinants of post-harvest losses in the grape value

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

chain in Dodoma region Tanzania' and discussants were Dr Joseph Longo and Prof Damian Gabagambi. Ms. Kurwijila is supervised by Dr Jeremiah Makindara and Prof Gilead Mlay.

3. Mr Haji Adi Omary presented findings from his PhD thesis titled '*Determinants of competitiveness and comparative economic advantage for rice production in Zanzibar*' and discussants were Prof Reuben Mbiha and Dr Khamaldin Mutabazi. Mr Omary is supervised by Prof Damina Gabambi and Prof Gilead Mlay.

On 9th January two presentations were done by PhD fellow during this month.

1. Mr. Million Sileshi Haile presented his PhD proposal and his project is titled '*Impact of soil and water conservation practices on vulnerability to food insecurity of farming households in Eastern Ethiopia*'.

Prof

Reuben Kadigi and Dr Khamaldin Mutabazi are the supervisors. Dr Damas Phili and Dr Gody Sanga were the discussants.

2. Mr Adrian Alphonse Barongo presented his PhD proposal which titled '*Avocado production and export market potential in Rungwe district, Tanzania*'. Prof Reuben Kadigi and Dr Jeremiah Makindara were discussants.

Public Lecture Seminar

On 9th March 2017, Dr Vicenzina Caputo who is an Assistant Professor at Michigan State University presented a public seminar at SAEBS, MSc Lecture Theatre on ***designing choice experiments***. The presentation was attended by postgraduate students, lecturers, head of departments and Dean of SAEBS.

Call for Papers, Book Chapters and Cases

The Journal of Continuing Education and Extension (JCEE) is an official publication of the [Institute of Continuing Education \(ICE\)](#), approved and recognized by the SENATE of [Sokoine University of Agriculture \(SUA\)](#). It provides a professional medium of communication for creative and innovative action oriented discourse based on research, theory and practice.

The Journal's audience (contributors and readers) comprises of researchers, practitioners, scholars and educators in various fields such as; extension, continuing professional education (literacy, distance education, vocational education, adult education), experiential learning for different aspects of development, practical implications of cross-cutting issues such as gender, ICT, HIV/AIDS, environment and globalization. Multidisciplinary contributions that cut across professional boundaries are highly encouraged.

The Journal now has three sections. Section one contains original journal articles, section two covers experiences from the field, which present case studies of various practical aspects of extension service delivery and continuing education. Such articles should represent best practices and other experiences that are presented for learning, sharing and scaling up. Section three is intended for book reviews.

Copy right of all articles published in the JCEE, except where indicated in the text, is assigned to the JCEE

Notes for Contributors

Articles

- Manuscript submitted to JCEE should not have been submitted to any other journal for publication.
- Manuscript should be submitted in electronic form only.
- Manuscript should be typed for printing on A4 paper, in Times Roman, font 12, using 1.5 spacing, with margins at the sides, top and bottom of at least one inch.
- Articles should not exceed 20 pages
- Manuscript should contain an abstract of 100 – 300 words
- The authors' name(s) and affiliation(s) should appear on a separate first page, also containing the abstract.
- Titles and Sub-titles should be bold and begin from the margin
- Figures and Tables should be presented clearly and precisely to permit reproduction
- Authors should use the Harvard Citation style. Cited works should appear on a separate page of "References". For example: Sife, A. S, Kiondo, E. and Lyimo-Macha, J. G. (2010). Influence of mobile phones and broadcast

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

media on rural communicative ecologies in Kilosa and Mvomero District, Tanzania. *JCEE*. 3(2): 1 – 12. Within text such citation would appear as (Sife *et al.*, 2010)

- Submitted manuscript should be written in a standard and consistent manner, free of typographic errors.
- Manuscripts should be in UK English.

Field Experiences

- Manuscripts of the field experiences will not require the academic rigour expected of journal articles in terms of conceptualization and analysis. The articles are however expected to present good case studies of experienced providing lessons for others to learn from. Such experiences could be best practices to be adapted or replicated. There could also be examples of bad experiences to be avoided in relation to technical and institutional aspects of development
- Their content should contain a description of (i) the experience (ii) lessons (positive and negative as appropriate)
- Submitted manuscript should be written in a standard and consistent manner, free of typographic errors, and should not exceed 10 pages.

Book review

- Book review are expected to be of interest and relevant to the field of extension and continuing education
- Book reviews should be concise, not exceeding one page of A4 with spacing 1.5.

The manuscript should be submitted electronically by 31 June 2017 to:

The Chief Editor Journal of Continuing Education and Extension

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

CALL FOR CONTRIBUTIONS

Encyclopaedia of Sustainability Management

Editors:

- Samuel O. Idowu, London Metropolitan University, London, UK
- Rene Schmidpeter, Cologne Business School, Cologne, Germany
- Nicholas Capaldi, College of Business Administration, Loyola University, New Orleans, USA
- Liangrong Zu, International Training Centre, International Labour Organisation (ILO), Turin, Italy
- Mara Del Baldo, University of Urbino, Portugal
- Rute Abrue, Polytechnic Institute of Guarda, Portugal

We are hoping to edit a book on the “**Encyclopaedia of Sustainability Management**” to be published in 2019 by Springer Publishing Company, New York, USA. We are looking for experienced scholars in the following six areas to be featured in the book:

1. **Corporate Social Responsibility (CSR)**
2. **Sustainability/Sustainable Development (S)/(SD)**
3. **Environment (Env)**
4. **Ethics (E)**
5. **Corporate Governance (CG)**
6. **Management (M)**

It is hoped that the encyclopaedia would contain up to 1,500 terms in the field of Sustainability and its related disciplines. Each contributor will be expected to choose a minimum of five terms and a maximum of twenty terms per contributors.

It is hoped that the encyclopaedia will be a reference book which practitioners, researchers, corporate managers, students etc would refer to during their day to day operations. Contributors would be expected to choose at least 1 term up to three terms from five excel sheets of terms/keywords and write a 3,000 – 5,000 word piece on each term chosen. Contributions on each term must include detailed explanations of the term with references.

A peer review method will be used in the project, so each contributor would be asked to review other contributor's submission for the encyclopaedia. We expect contributions to be of high quality; those that fail to meet the expected standards would be rejected.

The project's deadlines are as follows:

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

1. First draft of contributions to reach the lead editor by **Tuesday 1st February 2018**.
2. Contributions to Review go out to participating authors by **Monday 26th February 2018**.
3. Return of reviewed contributions should come back to the lead editor by **Thursday 19th July 2018**.
4. Corrected contributions following Reviewers comments come back to the lead editor on **Tuesday 20th November 2018**.

Closing date for expressions of interest is Tuesday 12th June 2017.

It will be possible for two or more individuals to work jointly or as a team on a single term but they must choose a minimum of five terms by this team of contributors. We have a list of terms but we equally encourage contributors to choose their own relevant terms and add them, in addition to those already on our list and work on them.

If interested in this project, please contact the lead editor :

Samuel O Idowu: Email address: s.idowu@londonmet.ac.uk

Call for Book Chapters

Book title: Emerging Markets and Sustainable Economy: Main Issues, Challenges and Scenarios

Publisher: Routledge UK

Description

Globalisation has emerged as one of the most important phenomena in international business with several studies exploring the economic significance of countries involved in international business. An increasing number of academic courses in subjects such as global business, international marketing and business as well as emerging markets have been combined with other disciplines having a global focus. However, critical approaches evaluating the sustainability of the economic success factors in emerging markets, the positive scenarios that have 'emerged' out of 'emerging markets', successful and 'challenger' firms or disruptive business models finding traction in advanced economies, have not generated enough attention from academics.

Although success from emerging markets have been celebrated, sustainability of growth over time is still largely unanswered due to the limitations of understanding institutional environments, environmental disruptions like climate change as well a societal transformations driving many of these emerging markets

This book aims to fill the void by developing an innovative approach that involves subject expertise from both practitioners in emerging markets as well as academic contributors in a sector oriented approach that will tackle complex questions.

Using an in-depth case study approach, the book is expected to explore the nature of global business environment, the geopolitical dynamics of the emerging markets including the role of institutions, institutional actors and non-institutional actors in driving sustainability. The editors hope that contributions will highlight challenges, breaking them down into sectorial challenges, geographical fault lines and critical depth of analysis using real-world insights from practitioners in emerging markets.

SAEBS Outlook

Vol.2.No.1

First Quarter 2017

While this is intended to be a research driven book with the bulk of contributions from academics of practitioners- turned academics, it is expected to incorporate case studies and examples from real life businesses, some this may not fit in within existing literature organisational theory. In line with the traditional debate on the linkage of globalisation and global trade, the importance of the South -South trade linkage specifically to the development of sustainable global value chains will be examined as well as new insights from global energy markets, the trade and renewable energy products and rise of new trade dynamics supported by the economic growth of several emerging states.

Case-studies are expected to be between 1000-2000 words, while chapter-like contributions up to a maximum of 5000 words, references included.

Topics

- Sustainable development and environmental challenges in emerging markets.
- Financial markets and emerging economies: The challenges of access to global markets, international financial institutions and challenges in engaging with emerging regions, the role of multilateral financial linkages in incorporating economic growth from emerging markets, institutional voids and challenges to sustaining SME growth in these regions.
- Political, institutional and governance challenges. The role of corruption in hindering economic growth and fostering environmental stewardship.
- Knowledge economy, shifting patterns of interaction work and outsourcing to emerging markets, service led growth scenarios, skill shortages and changing demographic forces, challenges with global talent mobility and barriers to creating sustainable strategies.
- Alternative business models, Cooperatives, sustainable community business and distributed leadership in economic organisations from emerging economies. MDGs and empowerment. Regional growth and sustainability.
- External trade and emerging countries. Challenges and fair trade. Trade creation and trade diversion. Doha Round and future development
- Waste management. Circular economy, sustainability and incentives to recycling. Urban mining. Issues in environmental preservation and development.
- The energy conundrum and sustainability challenges for the world economy. How energy is going to impact emerging markets' perspective for growth. Environmental issues. Alternative sources (e.g. shale oil & gas; tritium) Renewable energies. Scenarios : The role of China, H3D and the future of the space business
- Dealing with climate changes and sustainability. Scenarios from future studies and their impact on emerging markets

Submission Procedure

Researchers and practitioners are invited to submit on or before May 30, 2017, proposals of max 1,000 words clearly explaining key objectives of their perspective contributions.

Authors will be notified by June 15, 2017 about the status of their proposals and, if accepted for the book sent editorial guidelines. Full contributions are expected to be submitted by December 31, 2017
